ABOUT MYSELF

As a dedicated and detail-oriented Computer Science student with a strong foundation in software development, I seek to leverage my technical skills and academic knowledge in a challenging software engineering internship. Eager to contribute to innovative projects while gaining hands-on experience in coding, problem-solving, and teamwork within a dynamic development environment

WORK EXPERIENCE

City: Mansoura | **Country:** Egypt

[01/04/2025 - 01/05/2025]

Donation Management System

Ministry of Communications – Digital Egypt Initiative

Role: Full Stack Developer (.NET / Frontend)

Description:

Developed a complete Donation Management System as part of the Digital Egypt Initiative graduation project. The platform enables users to register, browse donation campaigns, and contribute securely. Admins can manage campaigns, track donations, and generate reports.

Key Responsibilities:

Designed and developed backend services using ASP.NET Core for secure and scalable APIs.

Implemented a responsive and user-friendly frontend using [HTML, CSS, JS, Bootstrap].

Integrated secure authentication and authorization features (JWT / Identity).

Connected the system to a SQL Server database with Entity Framework for data persistence.

Conducted unit testing and handled deployment on a cloud-based environment.

Collaborated within a team, applied Agile methodologies, and maintained version control using Git/GitHub.

Tech Stack:

ASP.NET Core, C#, Entity Framework, SQL Server, REST APIs, Git

City: Mansoura | **Country:** Egypt

[01/08/2025 - 01/09/2025]

Queue Management System – Full Stack Project

Team Project – 1st Place in Mega Team Competition

Role:

Backend Developer – Flutter Integration

Description:

Contributed to the development of a comprehensive Queue Management System, integrating frontend, backend, and mobile UI using Flutter. The platform enables users to take virtual tickets, monitor queue progress in real-time, and receive notifications, while administrators manage counters, track service metrics, and generate reports. The project won 1st place in a Mega Team competition, highlighting its innovation and impact and I was recognized as Best Member for outstanding contribution to the backend.

Key Responsibilities:

Developed backend APIs using ASP.NET Core to support Flutter frontend and mobile UI.

Integrated secure authentication, ticket management, and real-time queue tracking functionalities.

Coordinated with frontend and Flutter teams to ensure seamless API communication and data consistency.

Collaborated in a large development team following Agile methodology and maintained version control with Git/GitHub.

Conducted testing and troubleshooting for backend endpoints to ensure reliability and scalability.

Tech Stack:

ASP.NET Core, C#, REST APIs, SQL Server, Flutter, Git/GitHub, Agile Development , Cloudflare

City: Mansoura | **Country:** Egypt

[01/01/2025]

Lingoafy – Online Courses Platform

01/2025 – Present

Role:

Full Stack Developer (.NET / Frontend)

Description:

Designed and developed Lingoafy, an online courses platform that enables users to browse courses, enroll, and track their learning progress. The system includes instructor and admin functionalities to manage courses, content, and users efficiently.

Key Responsibilities:

Developed backend APIs using ASP.NET Core to handle users, courses, enrollments, and progress tracking.

Built a responsive and intuitive frontend using HTML, CSS, JavaScript, and Bootstrap.

Implemented secure authentication and role-based authorization (Student / Instructor / Admin).

Integrated the platform with SQL Server using Entity Framework for data management.

Designed the system architecture and database schema from scratch.

Applied clean code principles and version control using Git/GitHub.

Tech Stack:

ASP.NET Core, C#, Entity Framework, SQL Server, REST APIs, HTML, CSS, JavaScript, Bootstrap, Git/GitHub

City: Mansoura | **Country:** Egypt

[15/07/2025 - 15/09/2025]

Social Media App

Role:

Full Stack Developer (Python / Backend & Frontend)

Description:

Designed and developed a Social Media Application similar to Facebook, allowing users to create accounts, post content, interact with posts via likes and comments, and manage their profiles. The platform aims to provide a seamless and secure user experience for content sharing and social interactions.

Key Responsibilities:

Developed backend services using Django and Django REST Framework for authentication, user management, and post handling.

Implemented a responsive frontend using HTML, CSS, JavaScript, and Bootstrap.

Integrated PostgreSQL database for data storage and management with Django ORM.

Implemented secure user authentication and authorization.

Designed RESTful APIs for communication between frontend and backend.

Handled deployment and basic server management for hosting the application.

Applied version control and collaborative workflows using Git/GitHub.

Tech Stack:

Python, Django, Django REST Framework, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, Git/GitHub

City: Mansoura | **Country:** Egypt

[01/04/2025 - 01/05/2025]

E-Commerce Website

Role: Full Stack Developer (ASP.NET MVC)

Description:

Built a full-featured e-commerce web application. The platform allows users to browse products, add items to the cart, and complete orders, while admins can manage inventory, categories, and users.

Key Responsibilities:

Developed the application using ASP.NET MVC for structured and maintainable code.

Implemented product catalog, shopping cart, checkout, and order management features.

Designed the database schema and handled data operations using Entity Framework and SQL Server.

Created user registration, login, and role-based authorization (Admin/User).

Applied responsive UI design using HTML, CSS, Bootstrap, and JavaScript.

Integrated session handling, data validation, and secure payment simulation.

Used Git for version control and followed Agile practices with task tracking.

Tech Stack:

ASP.NET MVC, C#, Entity Framework, SQL Server, HTML, CSS, Bootstrap, JavaScript, Git

EDUCATION & TRAINING

[01/08/2022 - 01/08/2026]

Software Engineering

Faculty of Computer & Information Sciences - Mansoura University

<https://www.facebook.com/fcismans>

City: Mansoura | **Country:** Egypt | **Level in EQF:** 4

[01/10/2024 - 23/05/2025]

Full Stack .NET Web Developer

Digital Egypt Pioneers Initiative (DEPI) <https://depi.gov.eg/content/home>

- Developing and maintaining web applications using ASP.NET Core and .NET technologies.
- Working with frontend frameworks like Angular, React, or Blazor to build interactive UIs.
- Implementing RESTful APIs and integrating them with frontend applications.
- Managing databases using SQL Server, Entity Framework, and LINQ.
- Ensuring application performance, security, and scalability.
- Collaborating with a team to follow Agile methodologies and best software development practices.
- Deploying applications using CI/CD pipelines and cloud services like Azure.
- This program enhances my skills in both frontend and backend development, preparing me for real-world challenges in modern web development.

[01/07/2025 - 01/10/2025]

Full Stack Python Backend Developer Trainee

ITI – Information Technology Institute

Role:

Backend Developer Trainee

Description:

Completed a 3-month intensive Full Stack Python Backend training program, focusing on building robust and scalable web applications. Gained hands-on experience in backend development, database management, and integrating APIs with frontend applications. The program strengthened my practical skills and prepared me for real-world software development challenges.

Key Responsibilities:

Developed backend services using Python, Django, and Flask.

Implemented and consumed RESTful APIs for web applications.

Managed databases with PostgreSQL / SQLite and applied ORM techniques.

Collaborated with team members to develop projects following Agile practices.

Conducted testing, debugging, and ensured application performance and security.

Enhanced knowledge in integrating backend services with frontend interfaces.

Tech Stack:

Python, Django, Flask, REST APIs, PostgreSQL, SQLite, HTML, CSS, JavaScript, Git/GitHub

[01/07/2025 - 01/10/2025]

Full Stack Developer Trainee

NTI – National Telecommunication Institute

Role:

Full Stack Developer Trainee

Description:

Participated in a comprehensive full stack development training program, focusing on both backend and frontend technologies. Gained practical experience in building interactive web applications, managing databases, and deploying solutions using modern web development practices.

Key Responsibilities:

- Developed web applications using **ASP.NET Core / .NET technologies**.
- Worked with frontend frameworks such as **Angular, React, or Blazor** to create interactive UIs.
- Implemented and integrated **RESTful APIs** with frontend applications.
- Managed databases using **SQL Server, Entity Framework, and LINQ**.
- Ensured performance, security, and scalability of applications.
- Collaborated within a team using **Agile methodologies** and version control via **Git/GitHub**.

Tech Stack:

ASP.NET Core, C#, Angular / React / Blazor, SQL Server, Entity Framework, REST APIs, Git/GitHub, Agile Development

VOLUNTEERING

[15/07/2024 - 26/09/2024]

Aiesec Jaipur, India

The internship will start from 15 July 2024 and ending on 26 August 2024 for a maximum period of 6 weeks. Since it is a voluntary service, Poornima University will not provide any stipend but will provide accommodation and food. The work description of internship will be as follows:

- Skill building activities, reading skills, indoor/outdoor games, nature activities.
- Increasing brand awareness and locality awareness
- Interacting with Local children and teaching them some skills.
- Experience the RIOT of COLORS & fun activities with children.
- Mappingout and visiting undiscovered Tourist places
- Learning different cultures and enjoying cultural differences becoming a world citizen
